PIPING SYSTEMS

We have what you

GF Piping Systems

Our Mission

We are dedicated to designing, manufacturing and marketing piping systems for the safe and secure conveyance of liquids and gases.

Pipes

Fittings

Jointing Technologies

Facts and Figures GF Piping Systems

Sales CHF 800 million, over 3,000 employees worldwide, present in more than 100 countries

Georg Fischer – Adding Quality to People's Lives

GF Piping Systems is a core business of the Georg Fischer Corporation, founded in 1802 and headquartered in Schaffhausen, Switzerland.

Key figures of the Corporation:

Sales CHF 3.54 billion, 12,000 employees, 140 sites with 50 production facilities worldwide.

One-stop shopping at GF Piping Systems with over 40,000 products for diverse applications and specialized markets: from pipes and fittings to valves and measurement instruments and the respective jointing technologies.

Tailor-made solutions for any application in which fluids or gases are conveyed, whether in building technology, for water and gas utilities or for industrial sectors.

need

wherever you are

A global network of distributors – your partners are our partners

Our values

We put customers first

We act fast

We do what we say

Valves

Automation

Measurement and Control

Competent customer support

worldwide with our own sales companies and representatives. We always work with the best distributors in every country. They are our key partners when it comes to the fast availability of our products.

Fast delivery

with our electronic inventory management system and flexible production facilities. Our logistics services are consistently improved to satisfy our customers' high demands.

Your satisfaction

We do our utmost to serve you.

Customer needs guide our product development

Our specialists know your industry and speak your language. Through the active exchange of ideas with your experts in the field, we develop solutions adapted to each market segment. We have, for example, received the «Supplier Continuous Quality Improvement» Award from Intel for commitment to quality and

performance by suppliers that provide products and services deemed essential to Intel's success.

We offer customer support and training worldwide

We advise and train our customers on how to use and install our products. Thanks to our global sales network, technical support is always available wherever and whenever it is needed.

We measure your satisfaction

We monitor and measure our achievements against our customers' needs and act accordingly.

We put customers first

ction is our goal

Right on the spot

for you

We organize ourselves to respond promptly to your needs.

Local presence worldwide

Our sales and logistics organizations in over 100 countries and a tight network of distributors make certain that our products reach their destinations on time. Production sites in Europe, China and the USA mean shorter transport routes and more flexibility in meeting the specific requirements of each country.

Superior logistics

Only the best logistics are good enough to meet the diverse needs of a global market. We closely monitor transit time from order receipt to delivery so that our customers know exactly what they can expect. The customer can choose between a variety of shipment methods and can dictate the transit and delivery time according to his own requirements.

Speed in all details

We make sure that our employees are well trained in customer support and that communication channels are used efficiently. Our employees know that solving problems quickly is not a question of protocol, but the foundation for a successful partnership.

We act fast

You can

Our customers in the business of conveying fluids and gases need to have complete trust in the products they use. GF Piping Systems is the partner they can rely on.

Tested quality

Reliability and safety are ensured with our products. Depending on the application, such factors as longevity, purity, resistance to chemicals or extreme temperature fluctuations are decisive in selecting a piping system. We

test materials and products in our own testing facility, accredited according to ISO/IEC 17025.

Always trustworthy

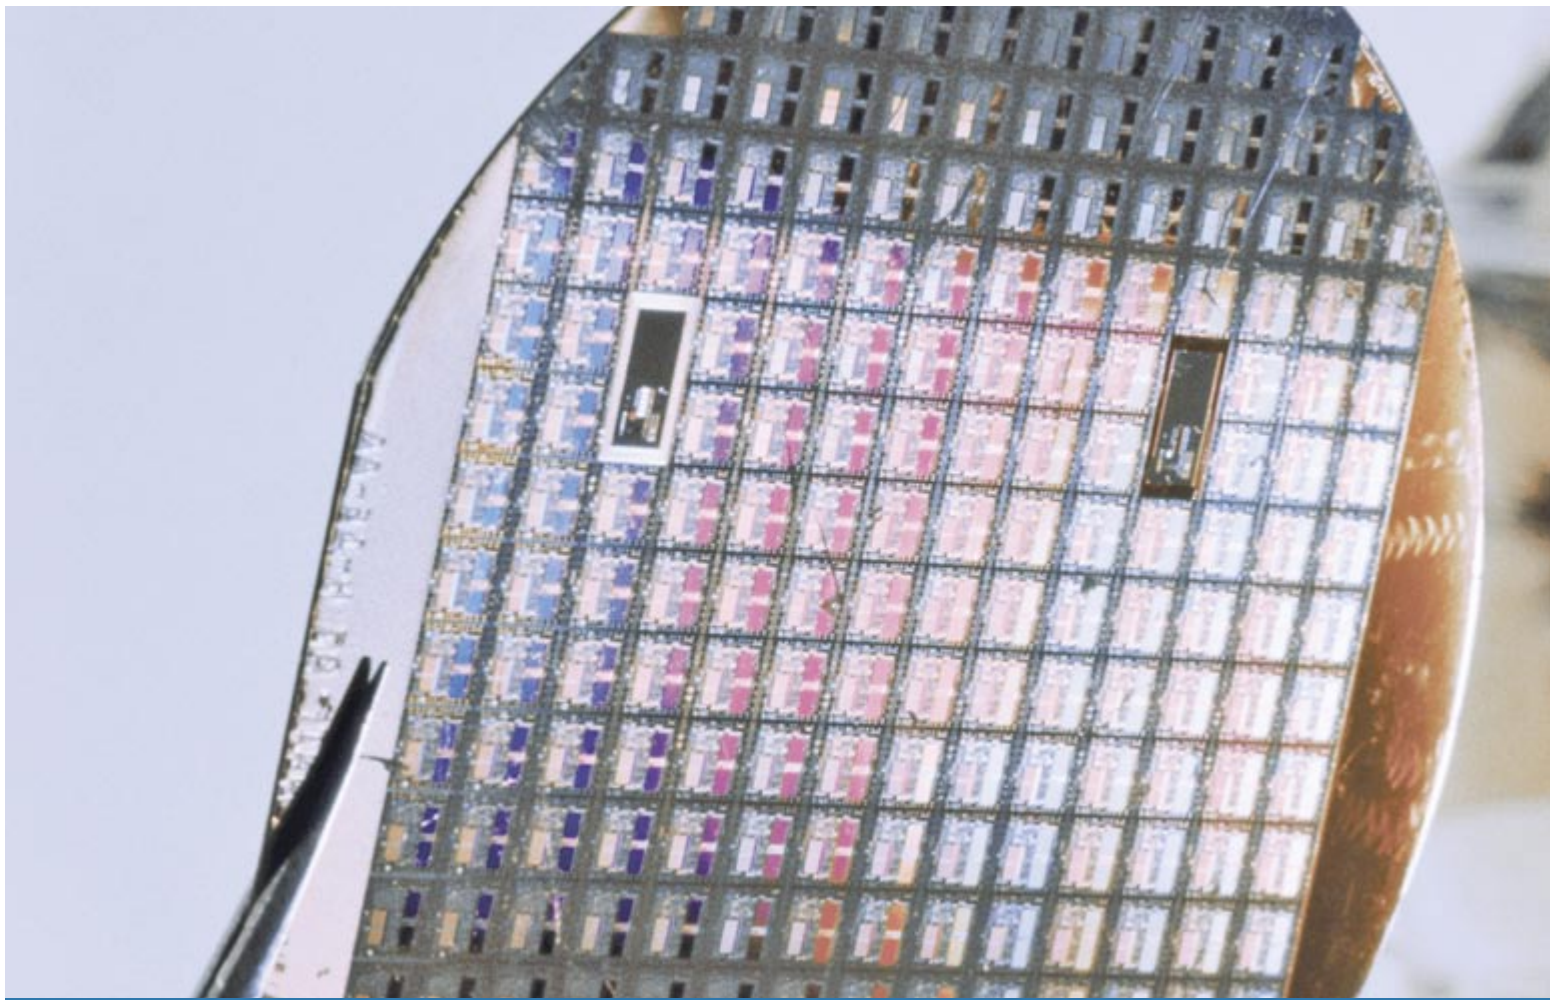

GF Piping Systems considers mutual trust to be a major key to success besides price and quality.

A long-term partnership cannot be established without dependability. We aim to meet delivery deadlines and to communicate openly, should problems arise.

We do what we say

count on us

Not all industries are alike – we offer you tailor-made solutions

Today, the use of plastic materials is expanding in industrial piping systems. The requirements placed on plastic piping systems are as diverse and demanding as the applications in which they are implemented.

Plastics have proven to be effective in industry because of their safe and economical installation, their high chemical resistance, their suitability in harsh environments, their longevity, their low weight, their high purity and optimal flow characteristics.

Ultrapure and deionized water, chemicals, coolants and critical fluids are just a few examples of media that are conveyed with our plastic piping systems. You can rely on our experience of more than 40 years in this field.

Water Treatment

Food and Beverage

→ All you need
from one source

We combine the products of our twenty development and production sites to offer you seamless compatibility with our pipes, fittings, valves, measurement and control devices and an unrivaled range of connection technologies.

Resistant and durable systems – that is our promise

Hygienic drinking water, pure in taste, smell and appearance, is one of the fundamental health requirements of the world's population. The piping systems in a water distribution network play a crucial role in this type of challenging application.

Also for the secure transport of gas it is essential that pipes, fittings, valves and other components are connected safely and reliably. We have the right solution for even the most difficult connections. We guarantee a safe

and reliable connection between different pipe materials and pipe dimensions even under the most severe circumstances. And with our butt fusion and electrofusion systems we offer you full traceability for integrated and sustainable quality assurance.

Reliable and efficient systems for water and gas utilities

Water and Gas Utilities

Water distribution

Gas distribution

→ **Cost-effective,
safe and reliable
solutions**

The development of customer-oriented solutions created for water and gas distribution is one of our core businesses. With our unique and comprehensive product portfolio we keep your systems running efficiently. Exclusive solutions can be put together trimmed to your requirements for main supply lines, house service connections or repairs and replacement work.

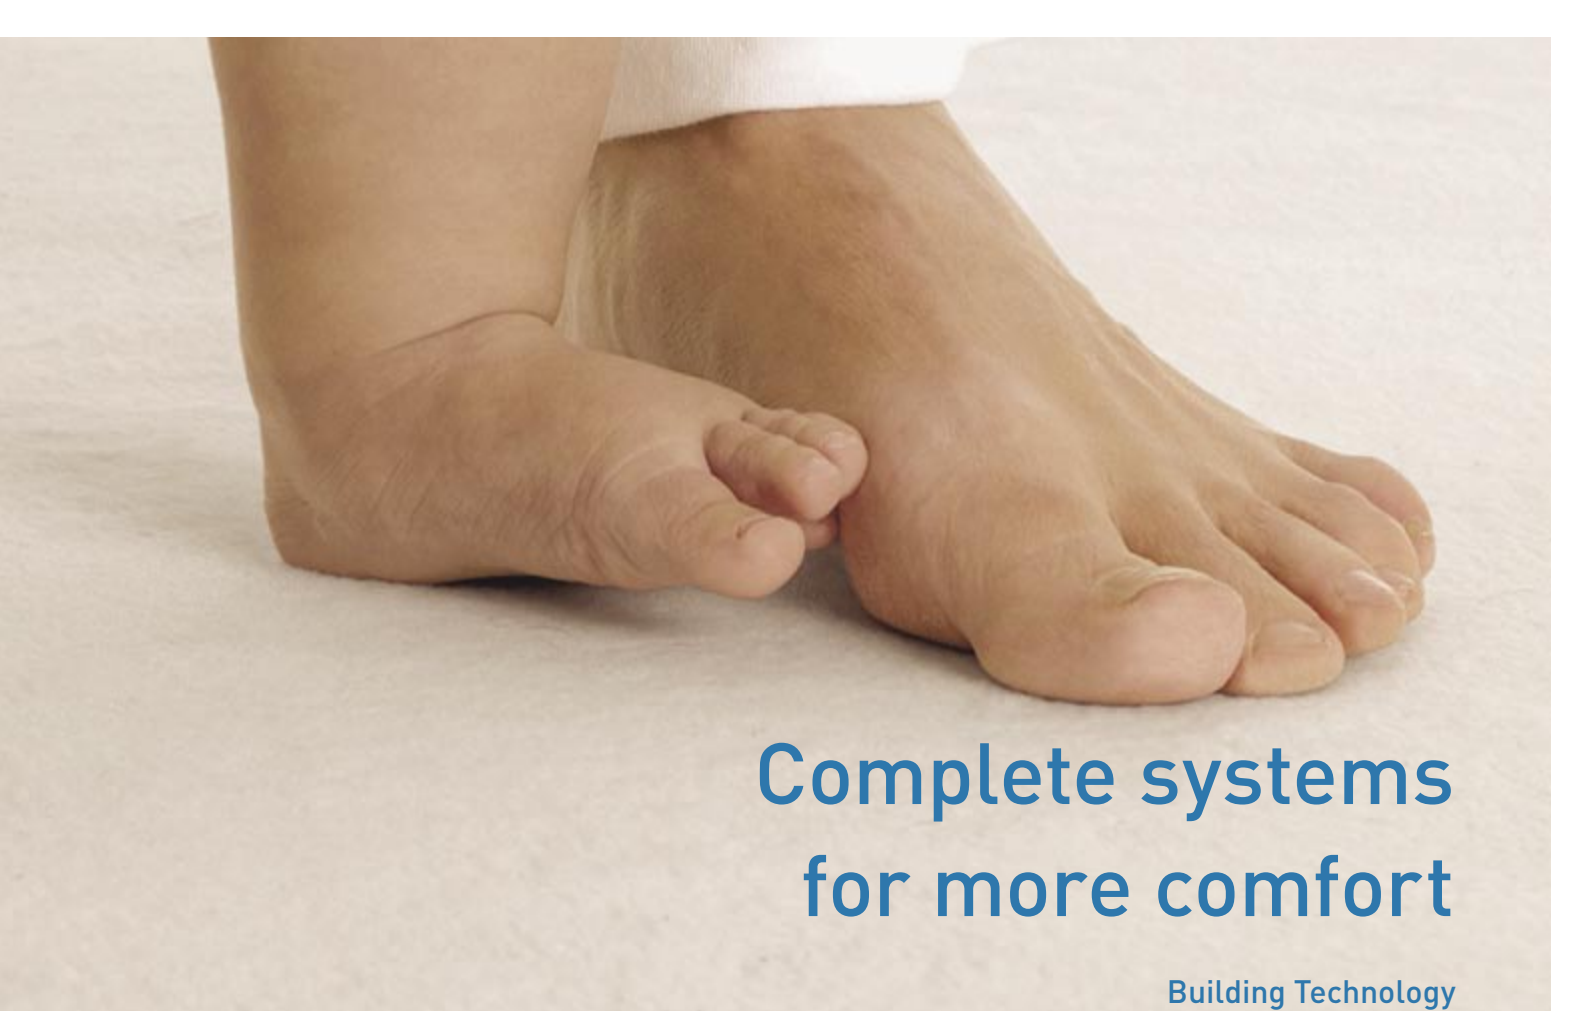

Our complete systems – precisely right for all installations in buildings

Comfort, hygiene and safety. We guarantee these values for homeowners and residents. And we make life easier for the installers with our modern installation systems for building technology. We offer you the right system for all kinds of applications in every building. One of our core competences is to distribute drinking water in buildings in a clean,

ecological and economical way. From the manifold to the riser to the last point of use, the water flows in a corrosion-free piping system with no incrustation. Our systems are also used in industrial building technology. Here we additionally offer systems for compressed air, vacuum and cooling.

Our products and their applications are a result of close cooperation with customers. This enables us to recognize market needs well in advance and to be among the trendsetters.

Complete systems for more comfort

Building Technology

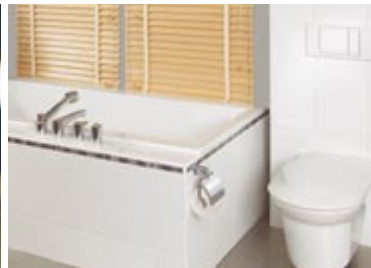

Floor heating

Drinking water systems

Pre-wall and flushing systems

→ Easy to install,
economical and
longlasting

We offer you one-stop shopping for drinking water systems, flushing technology, pre-wall systems, floor heating and in-house gas lines.

The most important criteria for all our systems is that they must be safe for people and the environment, easy to install, longlasting and cost-effective.
