

# We're looking for literature on plastics!

Are you moving?  
Clearing out the house?  
Going digital?

Maybe you have books or periodicals on the subject of plastics that you have to get rid of because of lack of space or that are no longer important for you:

- Reference and textbooks, Overview works
- Prehistory and early history of plastics
- Chemistry and physics of plastics, Materials science
- Plastic objects in art and design
- Plastic technology and processing, Extrusion, Injection molding
- Areas of application
- Cultural, economic, industrial and environmental history of plastics
- History of companies in the plastics industry, Product catalogs

Help the Iron Library and we'll help you.

We'll gladly take plastics literature off your hands and ensure that it is kept long-term and made accessible to the public.

## Plastics – a new collection focus of the Iron Library

The most recent collection focus on plastics will supplement optimally the traditional core of the Iron Library, its "brand" in iron, steel and history of technology. The Library's profile as an historically oriented specialist library for construction materials will be expanded and sharpened by the new focal point.
